[The Science of Breaking Bad](#) Dave Trumbore

2019-06-18 All the science in *Breaking Bad*—from explosive experiments to acid-based evidence destruction—explained and analyzed for authenticity. *Breaking Bad's* (anti)hero Walter White (played by Emmy-winner Bryan Cranston) is a scientist, a high school chemistry teacher who displays a plaque that recognizes his "contributions to research awarded the Nobel Prize." During the course of five seasons, Walt practices a lot of ad hoc chemistry—from experiments that explode to acid-based evidence destruction to an amazing repertoire of methodologies for illicit meth making. But how much of Walt's science is actually scientific? In *The Science of "Breaking Bad,"* Dave Trumbore and Donna Nelson explain, analyze, and evaluate the show's portrayal of science, from the pilot's opening credits to the final moments of the series finale. The intent is not, of course, to provide a how-to manual for wannabe meth moguls but to decode the show's most head-turning, jaw-dropping moments. Trumbore, a science and entertainment writer, and Nelson, a professor of chemistry and *Breaking Bad's* science advisor, are the perfect scientific tour guides. Trumbore and Nelson cover the show's portrayal of chemistry, biology, physics, and subdivisions of each area including toxicology and electromagnetism. They explain, among other things, Walt's DIY battery making; the dangers of Mylar balloons; the feasibility of using hydrofluoric acid to dissolve bodies; and the chemistry of methamphetamine itself. Nelson adds interesting behind-the-scenes anecdotes and describes her work with the show's creator and writers. Marius Stan, who played Bogdan on the show (and who is a PhD scientist himself) contributes a foreword. This is a book for every science buff who appreciated the show's scientific moments and every diehard *Breaking Bad* fan who wondered just how smart Walt really was.

them through word of mouth or by chance. The fifth in a series focusing on the largely undocumented world of internet TV, this book covers 573 children's series created for viewers 3 to 14. The genre includes a broad range of cartoons, CGI, live-action comedies and puppetry. Alphabetical entries provide websites, dates, casts, credits, episode lists and storylines.

Beyond Salsa for Ensemble - Cuban Rhythm Section Exercises Kevin Moore 2012-01-13 At 368 pages, *Beyond Salsa for Ensemble, Vol. 1* is the most ambitious of the 15 volume series. The course is designed for college and high school Latin music ensembles and working salsa bands seeking to add modern Cuban "timba" and "songo" material and techniques to their repertoires. The course begins with the basic salsa groove and then presents two modern Cuban grooves (one in 2-3 clave and one in 3-2 clave), with note-for-note transcriptions for piano, bass, bongo, timbales, congas, and drums - all explained in careful detail in a conversational style. The next part of the book teaches 36 rhythm breaks, or "efectos," that can be added to any Latin arrangement. Again, every stroke of every part is meticulously transcribed, with lead sheets also provided for more experienced players. Finally, the book contains a complete chart for performance of a popular Cuban hit by the popular group *Los Que Son*

Son, led by Pupy Pedrosó, the subject of several of the *Beyond Salsa Piano* books.

Billion Dollar Whale Tom Wright 2018-09-18 Named a Best Book of 2018 by the *Financial Times* and *Fortune*, this "thrilling" (*Bill Gates*) *New York Times* bestseller exposes how a "modern *Gatsby*" swindled over \$5 billion with the aid of Goldman Sachs in "the heist of the century" (*Axios*). Now a #1 international bestseller, *BILLION DOLLAR WHALE* is "an epic tale of white-collar crime on a global scale" (*Publishers Weekly*, starred review), revealing how a young social climber from Malaysia pulled off one of the biggest heists in history. In 2009, a chubby, mild-mannered graduate of the University of Pennsylvania's Wharton School of Business named Jho Low set in motion a fraud of unprecedented gall and magnitude--one that would come to symbolize the next great threat to the global financial system. Over a decade, Low, with the aid of Goldman Sachs and others, siphoned billions of dollars from an investment fund--right under the nose of global financial industry watchdogs. Low used the money to finance elections, purchase luxury real estate, throw champagne-drenched parties, and even to finance Hollywood films like *The Wolf of Wall Street*. By early 2019, with his yacht and private jet reportedly seized by authorities and facing criminal charges in Malaysia and in the United States, Low had become an international fugitive, even as the U.S. Department of Justice continued its investigation. *BILLION DOLLAR WHALE* has joined the ranks of *Liar's Poker*, *Den of Thieves*, and *Bad Blood* as a classic harrowing parable of hubris and greed in the financial world.

Shadow Moon Chris Claremont 2018-04-17 From two of the greatest imaginations of our time comes a magnificent novel of adventure and magic...*SHADOW MOON*: First in the *Chronicles of the Shadow War*. The genius of *Star Wars*(r) creator George Lucas and the vision of Chris Claremont, the author of the phenomenally bestselling *The Uncanny X-Men* adventures, merge in what must be the fantasy event of the year. In *Shadow Moon*, war and chaos have gripped the land of Tir Asleen. An ancient prophecy reveals one hope: a savior princess who will ascend to the throne when the time is right. But first, a Nelwyn wanderer must face

forces of unimaginable malevolence and dangerous, forbidden rites of necromancy that could bring back a powerful warrior from soulless sleep. George Lucas reshaped filmmaking in the '70s and '80s with his Star Wars and Indiana Jones films. When Bantam Books asked Lucas if he had any stories he would like to develop as novels rather than as films, Lucas turned to his 1988 fantasy film, Willow. "When I wrote the story for Willow, I began with the pre-story," Lucas said, "but the full story was yet to be told." Now, Lucas's vision is being fulfilled with the talented help of Chris Claremont. Having previously taken the reins of what was for a decade the bestselling comic in the western hemisphere (The Uncanny X-Men) Claremont assumes the responsibility of foster parent to Lucas's creation. On sale in hardcover now, and available on BDD Audio Cassette as well, SHADOW MOON is a momentous new adventure for readers looking to spend part of this summer in a fantastic world. SHADOW MOON is one of Bantam Spectra's most exciting publishing events in 1995, the year we celebrate our 10th Anniversary as the premiere publishing imprint of books of speculative fiction.

Television Cartoon Shows Hal Erickson 1995 In 1949 the first made-for-television cartoon series debuted on a major network. Tele-Comics embraced the popular cliffhanger serial genre,

using nonmoving comic strip panels and a handful of radio actors to produce a show at a fraction of the cost accrued by a live show. Despite the success of Tele-Comics and a few other such shows, television cartoons languished until 1954 when Walt Disney produced Disneyland. From such pioneers as Tele-Comics and Crusader Rabbit to modern fare such as X-Men and Beavis and Butthead, this is the first reference book to detail animated cartoons made exclusively for television from 1949 through 1993. Each entry includes the shows title, network, studios and full production information when available. An essay blending plot description, critical commentary, and background information is also provided for each cartoon. A discussion of the voice artist concludes the work.

The Mental Load Emma 2018-12-18 A new voice in comics is incisive, funny, and fiercely feminist. "The mental load. It's incessant, gnawing, exhausting, and disproportionately falls to women. You know the scene--you're making dinner, calling the plumber/doctor/mechanic, checking homework and answering work emails--at the same time. All the while, you are being peppered with questions by your nearest and dearest 'where are my shoes?', 'do we have any cheese?...' " --Australian Broadcasting Corp on Emma's comic In her first book of comic strips, Emma reflects on social and feminist issues by means of simple line drawings, dissecting the mental load, ie all that invisible and unpaid organizing, list-making and planning women do to manage their lives, and the lives of their family members. Most of us carry some form of mental load--about our work, household responsibilities, financial obligations and personal life; but what makes up that burden and how it's distributed within households and understood in offices is not always equal or fair. In her strips Emma deals with themes ranging from maternity leave (it is not a vacation!), domestic violence, the clitoris, the violence of the medical world on women during childbirth, and other feminist issues, and she does so in a straightforward way that is both hilarious and deadly serious.. If you're not laughing, you're probably crying in recognition. Emma's comics also address the everyday outrages and absurdities of immigrant rights, income equality,

and police violence. Emma has over 300,000 followers on Facebook, her comics have been shared 215,000 times, and have elicited comments from 21,000 internet users. An article about her in the French magazine L'Express drew 1.8 million views--a record since the site was created. And her comic has just been picked up by The Guardian. Many women will recognize themselves in *THE MENTAL LOAD*, which is sure to stir a wide ranging, important debate on what it really means to be a woman today.

The Wisdom of Crowds James Surowiecki 2005-08-16 In this fascinating book, New Yorker business columnist James Surowiecki explores a deceptively simple idea: Large groups of people are smarter than an elite few, no matter how brilliant—better at solving problems, fostering innovation, coming to wise decisions, even predicting the future. With boundless erudition and in delightfully clear prose, Surowiecki ranges across fields as diverse as popular culture, psychology, ant biology, behavioral economics, artificial intelligence, military history, and politics to show how this simple idea offers important lessons for how we live our lives, select our leaders, run our companies, and think about our world.

Drive Daniel H. Pink 2011-04-05 The New York Times bestseller that gives readers a paradigm-shattering new way to think about motivation from the author of *When: The Scientific Secrets of Perfect Timing* Most people believe that the best way to motivate is with rewards like money—the carrot-and-stick approach. That's a mistake, says Daniel H. Pink (author of *To Sell Is Human: The Surprising Truth About Motivating Others*). In this provocative and persuasive new book, he asserts that the secret to high performance and satisfaction—at work, at school,

and at home—is the deeply human need to direct our own lives, to learn and create new things, and to do better by ourselves and our world. Drawing on four decades of scientific research on human motivation, Pink exposes the mismatch between what science knows and what business does—and how that affects every aspect of life. He examines the three elements of true motivation—autonomy, mastery, and purpose—and offers smart and surprising techniques for putting these into action in a unique book that will change how we think and transform how we live.
