**My Father's Dragon** Ruth Stiles Gannett

2021-01-01 One cold rainy day when my father was a little boy, he met an old alley cat on his street. The cat was very drippy and uncomfortable so my father said, "Wouldn't you like to come home with me?" This surprised the cat—she had never before met anyone who cared about old alley cats—but she said, "I'd be very much obliged if I could sit by a warm furnace, and perhaps have a saucer of milk."

Excerpt: Hanna-Barbera Productions,

Inc. ( ) was an American animation studio that dominated American television animation for nearly three decades in the mid-to-late 20th century. The company was originally formed in 1957 by former Metro-Goldwyn-Mayer animation directors William Hanna and Joseph Barbera and live-action director George Sidney in partnership with Columbia Pictures' Screen Gems television division as H-B Enterprises, Inc.. Established after MGM shut down its animation studio and ended production of its animated short films (such as the popular Tom and Jerry series), H-B Enterprises, Inc. was renamed Hanna-Barbera Productions,

Inc. in 1959. Over the next four decades, the studio produced many successful animated shows, including The Huckleberry Hound Show, The Quick Draw McGraw Show, The Flintstones, The Yogi Bear Show, Top Cat, The Jetsons, The Magilla Gorilla Show, Jonny Quest, Space Ghost, Wacky Races, Scooby-Doo, Where Are You! and The Smurfs among others. The studio also produced several notable feature films and cartoon shorts for theaters along with a number of specials and movies for television. Hanna and Barbera's theatrical work received seven Oscars, and their television productions have earned them

eight Emmys. The pair was also awarded a Governors Award, a...

**Stronger Than Spinach: The Secret Appeal of the Famous Studios Popeye Cartoons** Steve R. Bierly  
Until now, the Famous Studios Popeye cartoons have never really been given a fair treatment by animation writers and historians. Authors have concentrated on the earliest Popeye cartoons from Fleischer Studios because those films broke new ground in technique and humor, and on the

made-for-TV cartoons of the 1960s because many of them are so awful. The Famous Studios cartoons are often just mentioned in passing. But from 1942-1957, Famous Studios, a division of Paramount Pictures, produced Popeye cartoons that have a fan-following to this day. These cartoons were shown on TV during the Baby Boomers' formative years and continue to be shown on cable and satellite channels today. In fact, they are the longest running cartoons in television syndication. Many of the kids through the years who grew up watching the Famous Studios films have found that the films grew up

with them because these cartoons were originally made to entertain adult movie-going audiences, before they were sold to TV and broadcast as kiddie fare. So, they contain adult themes, humor that uses verbal and visual double entendres, and mature sensibilities. They also, of course, are full of slapstick and are just plain fun. So, unlike some childhood joys that are left behind, the pleasure of the Famous Studios Popeye cartoons gets even stronger the older one gets. The Secret Appeal of the Famous Studios Popeye Cartoons explores the reasons for that. It sets Famous Studios in historical context and explains why the

creators working there made the films they did. Then the changes the creators made to the three main characters - Popeye, Olive Oyl, and Bluto are examined, along with Famous Studios' emphasis on sex and romance, tension and suspense and violence, and moral confusion - it's often hard to know who to root for in the cartoons, Popeye or Bluto! Amid the puns and the slapstick, there was a lot more going on. And it's the "more" which makes the films endlessly fascinating. Eleven cartoons are explained in depth, and then all the Famous Studios cartoons are scanned to uncover the magic elements they

each contain. The The Secret Appeal of the Famous Studios Popeye Cartoons ends by exploring the ways the films could have influenced other cartoons, comic books, and even feature length movies. The Secret Appeal of the Famous Studios Popeye Cartoons is a must read for anyone who has ever enjoyed Popeye cartoons and/or is interested in the character's history. And, perhaps even more importantly, it's a lot of fun, too!

*Drive* Daniel H. Pink 2011-04-05 The New York Times bestseller that gives readers a paradigm-shattering new way to think about motivation from

the author of *When: The Scientific Secrets of Perfect Timing* Most people believe that the best way to motivate is with rewards like money—the carrot-and-stick approach. That's a mistake, says Daniel H. Pink (author of *To Sell Is Human: The Surprising Truth About Motivating Others*). In this provocative and persuasive new book, he asserts that the secret to high performance and satisfaction—at work, at school, and at home—is the deeply human need to direct our own lives, to learn and create new things, and to do better by ourselves and our world. Drawing on four decades of scientific research on human

motivation, Pink exposes the mismatch between what science knows and what business does—and how that affects every aspect of life. He examines the three elements of true motivation—autonomy, mastery, and purpose—and offers smart and surprising techniques for putting these into action in a unique book that will change how we think and transform how we live.

**Historical Dictionary of Irish Cinema** Roderick Flynn 2007-07-30 In 1898, documentary footage of a yacht race was shot by Robert A. Mitchell, making him the first Irishman to shoot a film within Ireland. Despite early exposure to the

filmmaking process, Ireland did not develop a regular film industry until the late 1910s when James Mark Sullivan established the Film Company of Ireland. Since that time, Ireland has played host to many famous films about the country—*Man of Aran*, *The Quiet Man*, *The Crying Game*, *My Left Foot*, and *Bloody Sunday*—as well as others not about the country—*Braveheart* and *Saving Private Ryan*. It has also produced great directors such as Neil Jordan and Jim Sheridan, as well as throngs of exceptional actors and actresses: Colin Farrel, Colm Meaney, Cillian Murphy, Liam Neeson, Maureen O'Hara, and

Peter O'Toole. The Historical Dictionary of Irish Cinema provides essential facts on the history of Irish cinema through a list of acronyms and abbreviation; a chronology; an introduction; a bibliography; and hundreds of cross-referenced dictionary entries on the pioneers and current leaders in the industry, the actors, directors, distributors, exhibitors, schools, arts centers, the government bodies and some of the legislation they passed, and the films.

### *A Van Beuren Production* Hal Erickson

2020-10-01 Prolific American film producer Amedee J. Van Beuren (1879-1938) did not start out in the film industry. After a decade spent in business and advertising, Van Beuren turned his intellect and creativity towards acquiring a foothold in film and began building his empire. He is best known to animation fans for his bizarre cartoons of the 1920s and 1930s, featuring such

zanies as Molly Moo Cow, Cubby Bear and Tom and Jerry (not the cat-and-mouse duo). But the majority of the 1,499 films produced by Van Beuren between 1918 and 1937 were live-action short subjects--travelogues, comedies, musicals, sports reels and more. His roster of star performers included Bert Lahr, Shemp Howard, Ethel Waters and (indirectly) Charlie Chaplin. Van Beuren also made several feature films starring legendary big-game hunter Frank Buck, and a 12-episode serial headlining horror icon Lon Chaney, Jr. Capped by a complete list of his films, this engrossing chronicle of Amedee Van Beuren's

vast output is the first all-inclusive history of one of moviedom's most successful and least-known filmmakers.

*The 50 Greatest Cartoons* Jerry Beck 1994  
*The Art of Jay Ward Productions* Darrell Van Citters 2021-03 One animation empire was built

on a mouse, another was built on a rabbit. This one was built on the unlikely combination of a moose and squirrel. It began in the late 1940's, when Jay Ward and his lifetime friend, Alex Anderson, joined forces to create a cartoon series for the fledgling medium of television with a budget that would make "shoestring" look generous. The result was Crusader Rabbit, which debuted on a local NBC affiliate in Los Angeles in mid-summer of 1950. The cheaply produced and minimally animated series became the inauspicious and unlikely beginning of a TV animation powerhouse with a defiantly innovative-

and influential-brand of humor that shaped animated comedy for decades. As the 1950's drew to a close, Ward, with now-former partner Anderson's blessing, took two characters from an unsold series they had developed together, teamed with writer Bill Scott and a couple of freelance UPA artists, and created a short pilot film starring a flying squirrel and a hapless but hilarious moose. That pilot, Rocky The Flying Squirrel, launched an animation studio that turned out the funniest, hippest and most satirical cartoons on television and creating a comic vocabulary for generations of children and their

parents. The shows produced at Jay Ward Productions featured the wittiest writing in the medium, some of the best character voice work, and ... some of the worst animation. Assembling a staff of first rate writers and artists, Jay Ward was undermined by the cheapest budgets in what was already a low-budget medium. And it showed. In one of the earliest examples of runaway production, Ward was forced to send the animation out of the country. But what was happening with the art off the screen revealed a fascinating dichotomy of the brilliant draftsmanship on the drawing boards and the

crude but effective work that was aired. This behind-the-scenes artwork was never meant to be seen by the general public but was merely a means to an end. Now, for the first time anywhere, we are provided an in-depth look at the comic artistry of a talented group of designers, storytellers and directors who created such fondly remembered shows as Rocky and His Friends, Fractured Fairy Tales, Peabody's Improbable History, Dudley Do-right, George of the Jungle and Super Chicken.

*In the Studio* Todd Hignite 2007-09-21 Nine critically acclaimed cartoonists and graphic

novelists invite us into their studios to discuss their art and inspirations. These studio visits with some of today's most popular and innovative comic artists present an unparalleled look at the cutting edge of the comic medium. The artists, some of whom rarely grant interviews, offer insights into the creative process, their influences and personal sources of inspiration, and the history of comics. The interviews amount to private gallery tours, with the artists commenting, now thoughtfully, now passionately, on their own work as well as the works of others. The book is generously illustrated with full-color reproductions

of the artists' works, including some that have been published and others not originally intended for publication, such as sketchbooks and personal projects. Additional illustrations show behind-the-scenes working processes of the cartoonists and particular works by others that have influenced or inspired them. Through the eyes of these artists, we see with a new clarity the achievement of contemporary cartoonists and the extraordinary possibilities of comic art.

**The Negro Motorist Green Book** Victor H. Green  
The idea of "The Green Book" is to give the Motorist and Tourist a Guide not only of the

Hotels and Tourist Homes in all of the large cities, but other classifications that will be found useful wherever he may be. Also facts and information that the Negro Motorist can use and depend upon. There are thousands of places that the public doesn't know about and aren't listed. Perhaps you know of some? If so send in their names and addresses and the kind of business, so that we might pass it along to the rest of your fellow Motorists. You will find it handy on your travels, whether at home or in some other state, and is up to date. Each year we are compiling new lists as some of these places move, or go

out of business and new business places are started giving added employment to members of our race.

Cartoon Vision Dan Bashara 2019-04-02 In

Cartoon Vision Dan Bashara examines American animation alongside the modern design boom of the postwar era. Focusing especially on United Productions of America (UPA), a studio whose graphic, abstract style defined the postwar period, Bashara considers animation akin to a laboratory, exploring new models of vision and space alongside theorists and practitioners in other fields. The links—theoretical, historical, and aesthetic—between animators, architects, designers, artists, and filmmakers reveal a specific midcentury modernism that rigorously reimagined the senses. Cartoon Vision invokes

the American Bauhaus legacy of László Moholy-Nagy and György Kepes and advocates for animation's pivotal role in a utopian design project of retraining the public's vision to better apprehend a rapidly changing modern world.

**The 100 Greatest Looney Tunes Cartoons** Jerry Beck 2020-09-01 Celebrate the best of Looney Tunes cartoons, just in time for Bugs Bunny's 80th birthday! In a world of rascally rabbits, megalomaniacal ducks, and stuttering pigs, what defines greatness? This question was posed to thousands of cartoon fans, historians, and animators to create The 100 Greatest Looney Tunes Cartoons, the definitive Looney Tunes collection. Jerry Beck and the Cartoon Brew team

of animation experts reveal the amusing anecdotes and secret origins behind such classics as “What’s Opera, Doc?,” “One Froggy Evening,” and “Duck Dodgers in the 24½th Century.” Featuring more than 300 pieces of original art from private collectors and the Warner Bros. archives, The 100 Greatest Looney Tunes Cartoons settles the debate on the best of the best, and poses a new question: Is your favorite one of the greatest?

Walt in Wonderland Russell Merritt 2000 During the Roaring Twenties--from 1921 through 1928--Walt Disney and his friends made more than

ninety silent cartoons, turning them out as often as one or two per month. Years before Mickey Mouse, the young entrepreneur recruited and nurtured an extraordinary array of talented people. Drawing on interviews with Disney's coworkers, Disney's business papers, promotional materials, scripts, drawings, and correspondence, the richly illustrated *Walt in Wonderland* reconstructs Disney's silent film career and places his early films in critical perspective.

*Anime* Jonathan Clements 2019-07-25 This comprehensive history of Japanese animation draws on Japanese primary sources and testimony from industry professionals to explore the production and reception of anime, from its origins in Japanese cartoons of the 1920s and 30s to the international successes of companies such as Studio Ghibli and Nintendo, films such as *Spirited Away* and video game characters such as Pokémon.

*Genre and Television* Jason Mittell 2013-05-13

*Genre and Television* proposes a new understanding of television genres as cultural categories, offering a set of in-depth historical and critical examinations to explore five key aspects of television genre: history, industry, audience, text, and genre mixing. Drawing on well-known television programs from *Dragnet* to *The Simpsons*, this book provides a new model of genre historiography and illustrates how genres are at work within nearly every facet of television- from policy decisions to production techniques to audience practices. Ultimately, the book argues that through analyzing how television genre

operates as a cultural practice, we can better comprehend how television actively shapes our social world.

**Optical Poetry** William Moritz 2004 **Optical Poetry** is the first critical biography of the painter and experimental filmmaker Oskar Fischinger. Active in avant-garde art circles in Germany between the two world wars, Fischinger and his family would emigrate to Los Angeles just ahead of the Nazis' denunciation of degenerate art. Fischinger's pioneering experiments in Visual Music and the melding of graphic arts, abstract design, and sound were instrumental in shaping animation

into an art and cinematic form and inspiring animators to pursue its aesthetic potential. An accomplished representational animator who eventually worked uneasily under contract for Paramount, MGM, and Disney, Fischinger produced numerous abstract animated films over his lifetime, invented machines such as the "Wax Machine" and the "Lumigraph" for creating images, and became an accomplished and influential abstract painter. A labor of love for author William Moritz and the product of decades of research, **Optical Poetry** also includes an extensive filmography and testimonials from those

who knew or were influenced by Fischinger.

**The Animated Movie Guide** Jerry Beck 2005-10-28

Going beyond the box-office hits of Disney and Dreamworks, this guide to every animated movie ever released in the United States covers more than 300 films over the course of nearly 80 years of film history. Well-known films such as Finding Nemo and Shrek are profiled and hundreds of other films, many of them rarely discussed, are analyzed, compared, and catalogued. The origin of the genre and what it takes to make a great animated feature are discussed, and the influence of Japanese animation, computer graphics, and

stop-motion puppet techniques are brought into perspective. Every film analysis includes reviews, four-star ratings, background information, plot synopses, accurate running times, consumer tips, and MPAA ratings. Brief guides to made-for-TV movies, direct-to-video releases, foreign films that were never theatrically released in the U.S., and live-action films with significant animation round out the volume.

**The Science of Breaking Bad** Dave Trumbore  
2019-06-18 All the science in Breaking Bad—from explosive experiments to acid-based evidence destruction—explained and analyzed for authenticity. Breaking Bad's (anti)hero Walter White (played by Emmy-winner Bryan Cranston)

is a scientist, a high school chemistry teacher who displays a plaque that recognizes his “contributions to research awarded the Nobel Prize.” During the course of five seasons, Walt practices a lot of ad hoc chemistry—from experiments that explode to acid-based evidence destruction to an amazing repertoire of methodologies for illicit meth making. But how much of Walt's science is actually scientific? In The Science of “Breaking Bad,” Dave Trumbore and Donna Nelson explain, analyze, and evaluate the show's portrayal of science, from the pilot's opening credits to the final moments of the series

finale. The intent is not, of course, to provide a how-to manual for wannabe meth moguls but to decode the show's most head-turning, jaw-dropping moments. Trumbore, a science and entertainment writer, and Nelson, a professor of chemistry and Breaking Bad's science advisor, are the perfect scientific tour guides. Trumbore and Nelson cover the show's portrayal of chemistry, biology, physics, and subdivisions of each area including toxicology and electromagnetism. They explain, among other things, Walt's DIY battery making; the dangers of Mylar balloons; the feasibility of using hydrofluoric

acid to dissolve bodies; and the chemistry of methamphetamine itself. Nelson adds interesting behind-the-scenes anecdotes and describes her work with the show's creator and writers. Marius Stan, who played Bogdan on the show (and who is a PhD scientist himself) contributes a foreword. This is a book for every science buff who appreciated the show's scientific moments and every diehard Breaking Bad fan who wondered just how smart Walt really was.

**The Story of British Animation** Jez Stewart

2021-08-26 Jez Stewart charts the course of this extraordinarily fertile area of British film from early experiments with stop-motion and the flourishing of animated drawings during WWI. He reveals how the rockier interwar period set the shape of the industry in enduring ways, and how creatives like Len Lye and Lotte Reiniger brought art to advertising and sponsored films, building a foundation for such distinctive talents as Bob Godfrey, Alison De Vere and George Dunning to

unleash their independent visions in the age of commercial TV. Stewart highlights the integral role of women in the industry, the crucial boost delivered by the arrival of Channel 4, the emergence of online animation and much more. The book features 'close-up' analyses of key animators such as Lancelot Speed and Richard Williams, as well as more thematic takes on art, politics and music. It builds a framework for better appreciating Britain's landmark contributions to the art of animation, including Halas and Batchelor's *Animal Farm* (1954), Dunning's *Yellow Submarine* (1968) and the creations of Aardman

Animations.

Hollywood Cartoons Michael Barrier 2003-11-06

In *Hollywood Cartoons*, Michael Barrier takes us on a glorious guided tour of American animation in the 1930s, '40s, and '50s, to meet the legendary artists and entrepreneurs who created Bugs Bunny, Betty Boop, Mickey Mouse, Wile E. Coyote, Donald Duck, Tom and Jerry, and many other cartoon favorites. Beginning with black-and-white silent cartoons, Barrier offers an insightful account, taking us inside early New York studios and such Hollywood giants as Disney, Warner Bros., and MGM. Barrier excels at illuminating the

creative side of animation--revealing how stories are put together, how animators develop a character, how technical innovations enhance the "realism" of cartoons. Here too are colorful portraits of the giants of the field, from Walt and Roy Disney and their animators, to Bill Hanna and Joe Barbera. Based on hundreds of interviews with veteran animators, *Hollywood Cartoons* gives us the definitive inside look at this colorful era and at the creative process behind these marvelous cartoons.

**The Wisdom of Crowds** James Surowiecki

2005-08-16 In this fascinating book, *New Yorker*

business columnist James Surowiecki explores a deceptively simple idea: Large groups of people are smarter than an elite few, no matter how brilliant—better at solving problems, fostering innovation, coming to wise decisions, even predicting the future. With boundless erudition and in delightfully clear prose, Surowiecki ranges across fields as diverse as popular culture, psychology, ant biology, behavioral economics, artificial intelligence, military history, and politics to show how this simple idea offers important lessons for how we live our lives, select our leaders, run our companies, and think about our

world.
