**Representation in Steven Universe** John R. Ziegler 2020-01-09 This book assembles ten scholarly examinations of the politics of representation in the groundbreaking animated children's television series Steven Universe. These analyses address a range of representational sites and subjects, including queerness, race, fandom, colonialism, and the environment, and provide an accessible foundation for further scholarship. The introduction contextualizes Steven Universe in the children's science-fiction and anime traditions and discusses the series' crucial mechanic of fusion. Subsequent chapters probe the fandom's expressions of queer identity, approach the series' queer force through the political potential of the animated body, consider the unequal privilege of different female characters, and trace the influence of anime director Kunihiko Ikuhara. Further chapters argue that Ronaldo allows satire of multiple media forms, focus on Onion as a surrealist trickster, and contemplate cross-species hybridity and consent. The final chapters concentrate on background art in connection with ecological and geological narratives, adopt a decolonial perspective on the Gems' legacy, and interrogate how the tension between personal and cultural narratives constantly recreates memory.

**The Self-evolving Cosmos** Steven M. Rosen 2008 This unique book offers an original way of thinking about two of the most significant problems confronting modern theoretical physics: the unification of the forces of nature and the evolution of the universe. In bringing out the inadequacies of the prevailing approach to these questions, the author demonstrates the need for more than just a new theory. The meanings of space and time themselves must be radically rethought, which requires a whole new philosophical foundation. To this end, the book turns to the phenomenological writings of Maurice Merleau-Ponty and Martin Heidegger. Their insights into space and time bring the natural world to life in a manner well-suited to the dynamic phenomena of contemporary physics. In aligning continental thought with problems in physics and cosmology, the book makes use of topology. Phenomenological intuitions about space and time are systematically fleshed out via an unconventional and innovative approach to this qualitative branch of mathematics. The author's pioneering work in topological phenomenology is applied to such topics as quantum gravity, cosmogony, symmetry, spin, vorticity, dimension theory, Kaluza-Klein and string theories, fermion-boson interrelatedness, hypernumbers, and the mind-matter interface.

**Lovecraft Country** Matt Ruff 2016-02-16 Now an HBO® Series from J.J. Abrams (Executive Producer of Westworld), Misha Green (Creator of Underground) and Jordan Peele (Director of Get Out) The critically acclaimed cult novelist makes visceral the terrors of life in Jim Crow

America and its lingering effects in this brilliant and wondrous work of the imagination that melds historical fiction, pulp noir, and Lovecraftian horror and fantasy. Chicago, 1954. When his father Montrose goes missing, 22-year-old Army veteran Atticus Turner embarks on a road trip to New England to find him, accompanied by his Uncle George—publisher of *The Safe Negro Travel Guide*—and his childhood friend Letitia. On their journey to the manor of Mr. Braithwhite—heir to the estate that owned one of Atticus's ancestors—they encounter both mundane terrors of white America and malevolent spirits that seem straight out of the weird tales George devours. At the manor, Atticus discovers his father in chains, held prisoner by a secret cabal named the Order of the Ancient Dawn—led by Samuel Braithwhite and his son Caleb—which has gathered to orchestrate a ritual that shockingly centers on Atticus. And his one hope of salvation may be the seed of his—and the whole Turner clan's—destruction. A chimerical blend of magic, power, hope, and freedom that stretches across time, touching diverse members of two black families, *Lovecraft Country* is a devastating kaleidoscopic portrait of racism—the terrifying specter that continues to haunt us today.

Universe: End of an Era is a heartfelt send-off to one of the most progressive, imaginative, and beloved animated series of our time. **Life on Other Worlds** Steven J. Dick 1998-09-28 Are we alone in the Universe? From the furor over Percival Lowell's claim of canals on Mars at the beginning of the century to the more recent controversial rock from Mars and the sophisticated Search for Extraterrestrial Intelligence (SETI), the prospect of otherworldly life has often titillated and occasionally consumed science and the public. The search for planetary systems, the quest to explain UFOs, and inquiries into the origin of life have fueled an abundance of popular and scientific literature. They have also provided Hollywood with fodder for some of the most popular films of our time, including ET, Aliens, Independence Day, and Contact. Lucid and accessible, *Life on Other Worlds* chronicles the history of the twentieth-century extraterrestrial debate. Putting the latest findings and heated controversies into a broader historical context, Steven Dick documents how the concept of extraterrestrial intelligence is a world view of its own--a "biophysical cosmology" that seeks confirmation no less than physical views of the Universe. The debate rests at the very limits of science, and attempts at confirmation only illuminate the nature of science itself. Dick shows that appreciating the history of the debate enables a better understanding of the nature of science, and is central to any forward-looking view of religion and philosophy. For anyone interested in a look over the edge of scientific discovery, *Life on Other Worlds* provides the exciting tale behind the greatest debate in the twentieth century. Dr. Steven J. Dick is an astronomer and historian of science at the U.S. Naval Observatory. He is the author of *Plurality of Worlds: The Origins of the Extraterrestrial Life Debate from Democritus to Kant* (Cambridge, 1982) and *Biological Universe* (Cambridge, 1996). **McGraw-Hill's 10 ACT Practice Tests, Second Edition** Steven W. **Born in Flames** Howard Hampton 2007 Twenty years as an outsider scouring the underbelly of American culture has made Howard Hampton a uniquely hardnosed guide to the heart of pop darkness. Bridging the fatalistic, intensely charged space between *Apocalypse Now Redux* and *Nirvana's Smells Like Teen Spirit*, his writing breaks down barriers of ignorance and arrogance that have segregated art forms from each other and often from the world at large. In the freewheeling spirit of Pauline Kael, Lester Bangs, and Manny Farber, Hampton calls up the extremist, underground tendencies and archaic forces simmering beneath the surface of popular forms. Ranging from the kinetic poetry of Hong Kong cinema and the neo-"New Wave" energy of Irma Vep to the punk heroines of Sleater-Kinney and *Ghost World*, *Born in Flames* plays odd couples off one another: pitting *Natural Born Killers* against *Forrest Gump*, contrasting Jean-Luc Godard with Steven Spielberg, defending David Lynch against aesthetic ideologues, invoking *The Curse of the Mekons* against Fredric Jameson's Postmodernism, and introducing D. H. Lawrence to *Buffy the Vampire Slayer*. "We are born in flames," sang the incandescent Lora Logic, and here those flames are a source of illumination as well as destruction, warmth as well as consumption. From the scorched-earth works of action-movie provocateurs Seijun Suzuki and Sam Peckinpah to the cargo cult soundscapes of Pere Ubu and the Czech dissidents *Plastic People of the Universe*, *Born in Flames* is a headlong plunge into the passions and disruptive power of art.

James Jones Steven R. Carter 1998 James Jones's spiritual beliefs were central to his great World War II trilogy *From Here to Eternity*. *The Thin Red Line*, and *Whistle*, as well as to the rest of his fiction. In this first book-length exploration of the subject, Steven Carter argues that Jones's ideas about reincarnation, karma, and spiritual evolution were heavily influenced by transcendentalism, theosophy, and Oriental religions. The author places Jones in what he identifies as a tradition of American literary Orientalism that includes Emerson, Thoreau, Kerouac, Ginsberg, and others. Carter bases his argument on extensive research into American literature and criticism coupled with visits and personal correspondence with Jones.
